

The target: oxidative stress

Free radicals

Defense system

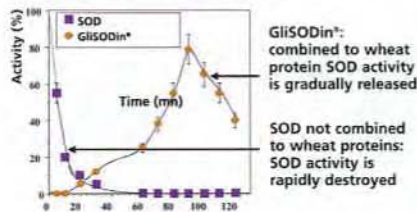

The product: the first orally effective SOD

A 100% vegetable system

First SOD protected from digestive degradation

GliSODin® absorption during its passage through gastrointestinal tract

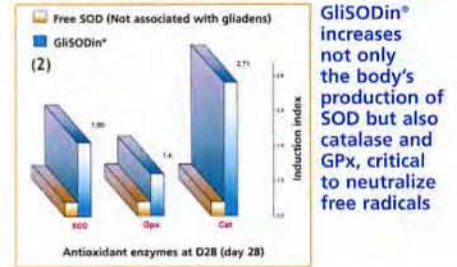

Applications :

* In all conditions where oxidative stress and excess free radicals are implicated or when the immune system is challenged. (Physical exercise, cold exposure, UV exposure,...)*

The benefit: proven efficacy studies

Pharmacological study

GliSODin® stimulates the body's own antioxidant defenses*

Human clinical trial**

Healthy volunteers in an accelerated oxidative stress using hyperbaric chamber

This study demonstrates that GliSODin® has a protective effect against oxidative stress in human subjects**

** Accepted for publication in a peer-reviewed journal.
